

Yixuan Wang

Location: Boston, USA; Tel: +86 13305800693; E-mail: windy_0101@163.com

Education Background

Boston University | Bachelor of Arts in Economics, Minor in Statistics; GPA: 3.91/4.0 01/2024-05/2026

- Core Modules: Empirical Economics; Statistical Analysis; Basic Economics & Probability: Applied STAT; Multivariable CAL

Syracuse University | Bachelor of Arts in Economics; GPA: 3.68/4.0 09/2022-12/2023

- Core Modules: Intermediate Microeconomics; Intermediate Macroeconomics; Introduction to STAT for Management; Probability and Statistics for Liberal Arts

IT Skills: R, Stata, Java, Python, SPSS, SQL

Internship & Professional Experience

Caitong Securities Co., Ltd. (Zhoushan Branch) | Zhejiang, China 06/2024-07/2024

Position: Intern at the Fortune Center

- Collected, organized, and analyzed market data to support investment decision-making, ensuring the timeliness and accuracy of financial information
- Prepared daily market reports summarizing key movements, trends, and trading activity for equities, bonds, and other financial instruments
- Assisted in research on market trends and investment instruments, applying statistical analysis to identify financial patterns and inform investment strategies

Huatai Securities Co., Ltd. | Beijing, China 04/2024-05/2024

Position: Investment Banking Intern

- Conducted research on the M&A market and strategies, collecting and analyzing five years of domestic and cross-border M&A transaction data
- Compared M&A patterns, transaction scales, and strategy differences (e.g., Bolt-on vs. Tuck-in acquisitions), and analyzed associated risks and value creation
- Assisted in developing due diligence frameworks and checklists, examining their role in investment decision-making
- Produced several strategic reports, including "China M&A Market Analysis", "Value Creation Comparison of M&A Strategies," and "M&A Due Diligence Framework"

Project Experience

Price Prediction of Used BMW Cars Based on Regression Analysis 06/2025-08/2025

Supervisor:

- Independently cleaned and explored a dataset of 4,843 used BMW vehicles in 2018, analyzing distributions and relationships between price, mileage, and features
- Extracted variables including vehicle age, sale month, and configuration features to capture depreciation patterns and seasonal price fluctuations
- Built and validated a predictive pricing model (21 predictors) in R, demonstrating strong explanatory power (mention R^2 if possible) through rigorous diagnostic testing
- Evaluated model performance on the test set, completed the project report, and delivered findings in a presentation
- Enhanced skills in programming, model diagnostics, and business data analytics

Hotelling's Rule: Theory versus Empirical Evidence 06/2025-06/2025

Supervisor: Dr. Ekaterina Gnedenko

- Conducted a systematic literature review to analyze the differences between Hotelling's rule (net price of nonrenewable resources should rise at the rate of interest) and empirical evidence
- Identified key factors causing the differences, including cost-reducing technological progress, continuous resource discoveries, OPEC pricing and speculation, and the model's omission of environmental externalities
- Examined the limitations of the Hotelling model, and explored how policy tools such as carbon pricing and pollution taxes can internalize external costs and reshape resource price paths
- Revealed the gap between theoretical predictions and real-world data through literature review and empirical comparison, and compiled findings into a presentation

Comparative Study of the Current Economic Situation of Russia and France 07/2023-08/2023

Supervisor: Dr. Ekaterina Gnedenko

- Collected and analyzed macroeconomic data and policy literature to compare the economic conditions of Russia and France
- Examined economic growth and employment trends, integrating growth rates and unemployment data for Moscow and Paris, and produced comparative tables illustrating differential patterns.
- Explained structural differences between the two countries; Russia relies on energy exports and expands cooperation with Asian countries, while France centers on manufacturing and services within the EU framework
- Explored how structural economic differences reflect geopolitical orientations and impact bilateral and regional political relations, and deepened understanding of economic-political interactions

Extracurricular Activities

Zhoushan Overseas Chinese Association - Overseas Students' Hub	06/ 2024-Present
- Collaborated with a network of overseas students through structured events, leading to a deeper understanding of global career paths and an expansion of my professional network	
International Student Exchange Summit, Whitman School of Management, Syracuse University	04/2023-12/2023
- Participated in cross-cultural dialogues with professors and alumni, expanding professional network and career insights	
Student Entrepreneurship Clubs, Syracuse University	11/2022-05/2023
- Participated in E-Club to gain insights into the entrepreneurial process, financing strategies, and market entry approaches; Analyzed case studies on startup ventures to understand the relationship between entrepreneurship and the policy environment
